EXPERIENCE

ServiceNow, San Diego, CA

August 2024 – Present

Business Development Representative

- Consistently exceed quota while generating and qualifying pipeline across Mid-Market, Commercial, and Enterprise accounts through inbound and targeted outbound outreach.
- Run weekly inbound qualification calls to confirm ICP fit, uncover pain/gain, identify stakeholders, and define next steps; deliver structured notes that accelerate deal progression including cases moving directly to demo
- Built an AI-powered account planning and targeting workflow saving 4+ hours of manual research per account and enabling faster, POV-led outreach for the broader account team
- Created repeatable pre-call and post-call workflows, saving 30+ minutes per call, shrinking prep time, call-to-follow-up time, and increasing prospect engagement
- Designed over 10 AI-enabled workflows and automation tools, adopted by over 50 peers, saving each rep 10+ hours weekly and enabling personalization at scale

ServiceNow, San Diego, CA

June 2023 – August 2023

Sales Development Representative Intern

- Secured two qualified meetings through multi-channel outreach, driving \$200K+ in NNACV.
- Executed outreach campaigns to new logo and existing customer accounts, broadening executive engagement and strengthening relationships.

TechSmith Corporation, East Lansing, MI

May 2022 – July 2024

Inside Sales Intern

- Closed over \$100,000 of sales by quickly qualifying requests and aligning solutions to customer needs.
- Managed lead and opportunity tracking in Salesforce for 300+ accounts to support visibility and accurate pipeline reporting.
- Contributed to reshaping the internship program by supporting the shift from inbound-only support to include outbound processes, establishing a framework for future interns.

PROFESSIONAL DEVELOPMENT

MIT Professional Education

Issued: December 2025

Applied Agentic AI for Organizational Transformation, Certification

- Coursework focused on designing multi agent AI systems for reliable workflow automation, covering prompt engineering, agent coordination, and responsible AI principles in real business environments.
